BLOCKAGES OF BANK ACCOUNTS

In the period between **14.5.2025** and **14.5.2026** the entity had no blocked bank accounts.

Data are shown in 1 EUR

REAL ESTATE OWNERSHIP

According to Surveying and Mapping Authority of the Republic of Slovenia the entity owns the following number of constituents of the real estate: 2.876.

The total value of real estate is: 362.410.240 € .

PAYMENT HABITS

For the period of the last three months the entity pays its obligations on due date

Payment habits for last 12 months
the entity pays its obligations on due date

Payment habits for last 6 months
the entity pays its obligations on due date

Note: The payment habits rating is represented by an index in the range from »1«(worst payment habits) to »11« (best payment habits). The calculation of the payment habits is based on the collected invoices from our internal database for the last 12 months. The calculation of the payment habits is only an approximation of the payment discipline of the entity, as it covers only data that is available to us and does not include all payments of all invoices issued to the entity.

TAX DEBT

On the day 25.4.2026 the entity is not on the list of tax obligors or non-submitters of reports for wages.

CREDIT RATING

The representative indicators of the static and dynamic rating indicate an entity with a good credit rating and a low risk of non-payment.

Note: A higher credit rating is a signal that the entity is in a better financial condition with a lower risk of non-payment.

Credit rating - descriptive summary:

Credit rating - descriptive summary: The current credit rating is based on balance sheet data for the financial year 2025. The given credit rating is determined on the basis of the following facts and taking into account the economic activity in which the entity is classified: The bank accounts of the entity have never been blocked. The share of long- and short-term liabilities in the balance sheet shows a moderate degree of dependence on foreign sources of financing. The excess of short-term liabilities over short-term assets leads to illiquidity. The amount of receivables compared to the generated revenue is favorable and does not lead to credit exposure. The rate of return on assets generated by the entity from regular operations is appropriate. The size of revenues compared to the assets indicates a high asset turnover rate. In the last year the entity is not involved in litigations, whether as a defendant or as a plaintiff, or the values of the matters in dispute are relatively irrelevant. In the last year the entity was not a tax obligor or a non-submitter of reports for wages. The entity as creditor has lodged claims in insolvency proceedings, initiated in the last year, but due to the relatively low volume of these in relation to the generated revenue, it is not significantly exposed to the risks of insolvency of its customers.

DEBT CAPACITY

Debt capacity:	847.977.000 EUR
Actual financial liabilities:	545.221.000 EUR
Difference:	302.756.000 EUR

Note:

The **debt capacity** is an information expressed in an absolute figure that is primarily intended to complement the given credit rating of the entity and only to indicate the creditworthiness of the entity from the point of view of a sustainable volume of its total financial liabilities. The actual debt capacity largely depends on the development prospects, actual investment projects, operational, remedial or other short-term plans of a certain entity, and, finally, also from the concrete and specific options for the insurance of the repayment of the financial liabilities. The amount, expressed as an absolute figure, gives information about the size class of the entity in terms of its debt capacity. It is an estimated maximal amount of the financial liabilities of the entity at which it could, under the assumption of continued business operations in given ranges, be able to regularly settle his liabilities over the medium term. The debt capacity is calculated on the basis of the last published financials taking into account the volume and dynamics of the cash flow of the entity and also its funding structure of assets.

The **stated difference** is the difference between the debt capacity and the actual financial liabilities of the entity. The amount indicates the value of the allowable additional indebtedness of the entity according to the estimated debt capacity.

CREDIT LIMIT

Credit limit: 600.000 EUR

Note:

The **credit limit** is the estimated maximum amount to which it is still advisable to supply the goods or services to the entity on deferred payment of its obligations for a period of up to two months. The credit limit is a rough estimate of the recommended delivery ceiling with deferred payment based on the assumed sales, cash flow, short-term liquidity position, business performance according to the latest balance sheet and according to the current credit rating of the entity. The maximum credit limit is capped at € 600,000.

The credit limit is not calculated for entities, for which a credit rating is not given or is less than or equal to 2, for entities that have or have recently had blockages of its bank accounts and in some other cases.

When assessing the possibility of a sale on deferred payment in a concrete case, it is advisable to assess the limit according to one's own experience with the entity and in relation to one's own exposure to the entity in terms of the amount of one's own revenues.

INSOLVENCY PRESUMPTION

For the entity no insolvency presumption according to Article 14 of the Insolvency Act (ZFPPIPP) applies.

INSOLVENCY PROCEEDINGS

The entity PETROL d.d., Ljubljana is not or was not subject to any insolvency proceedings.

COURT HEARINGS

In the period from 1.1.2010 to 24.5.2026 litigations were recorded with the entity as defendant (total number of litigations: 66; total value of the matters in dispute 27.838.174,00 EUR).

In the period from 1.1.2010 to 24.5.2026 litigations were recorded with the entity as plaintiff (total number of litigations: 163; total value of the matters in dispute 21.672.744,00 EUR).

Note: In cases where the entity is a party to a litigation the data about the number of litigations, their value and other information is available only for those litigations for which at least one court hearing was scheduled in the given period.

LODGEMENT OF CLAIMS IN INSOLVENCY PROCEEDINGS OF OHTER BUSINESS ENTITIES

The entity PETROL d.d., Ljubljana has in the last year (from 14.5.2025 to 14.5.2026) lodged its claims in insolvency proceedings of other business entities in the total amount of 968.305,82 EUR.

DESCRIPTION OF MORE IMPORTANT MODELS

THE ALTMAN MODEL

The scale of the classification and interpretation of coefficient (Z value):

- $Z \geq 2,99$ The entity is financially strong and stable
- $Z < 2,99$ and $Z > 1,81$ The entity's financial condition is according to this model in the neutral area
- $Z < 1,81$ The entity is in serious financial difficulties

The border line (50 %) for the probability of entity's bankruptcy is the value $Z = 2,675$.

The entity achieved the following values:

- In the year 2023 value 3,21
- In the year 2024 value 3,04
- In the year 2025 value 3,03

THE KRALICEK QUICK TEST

The scale of classification of coefficient (DF value):

- $DF \geq 3,00$ Excellent financial stability
- $DF < 3,00$ and $DF \geq 2,20$ Very good financial stability
- $DF < 2,20$ and $DF \geq 1,50$ Good financial stability
- $DF < 1,50$ and $DF \geq 1,00$ Medium financial stability
- $DF < 1,00$ and $DF \geq 0,30$ Bad financial stability
- $DF < 0,30$ and $DF \geq 0,00$ Start of insolvency
- $DF < 0,00$ and $DF \geq -1,00$ Moderate insolvency
- $DF < -1,00$ Overwhelming insolvency

The entity achieved the following values:

- In the year 2023 value 1,12
- In the year 2024 value 1,44
- In the year 2025 value 1,82

DISCRIMINANT ANALYSIS

"The scale of classification of coefficient (Z value):

- $Z \leq -3,00$ The entity is financially strong and stable
- $Z > -3,00$ and $Z \leq 0,25$ The entity's financial condition is according to this model in the neutral area
- $Z > 0,25$ The entity is in serious financial difficulties

The entity achieved the following values:

- In the year 2023 value -0,29
- In the year 2024 value -0,43
- In the year 2025 value -0,43
